

COMMON DIGESTIVE DISORDERS

IBS, Celiac Disease, Crohn's Disease, GERD, Ulcerative Colitis

Life-Changing Results, Real Cost Savings

Over 70 million Americans struggle with a digestive condition that impacts their entire life, including their **ability to work**. For these people, symptoms are unpredictable and so severe that trips to the ER, surgeries, and expensive Rx drugs are a way of life.

- **Missed work:** average 35 days/year, 3x more than most chronic conditions
- **Medical care:** 22M hospitalizations and 21M surgeries / year
- **Cost of Rx drugs:** \$18,000 to \$150,000 per year, second only to cancer

GIThrive[®] from Vivante Health is the **ONLY** all-in-one digital program for digestive health and disease. It's grounded in science, facilitated by nifty technology, and led by a human care team.

How We Do It

RESULTS MATTER. Using cutting-edge microbiome science, behavioral psychology, and insights from the latest research, we address all the key areas proven to impact gut health:

Lifestyle Courses

To form new healthy habits that stick, quickly and with minimal effort

Therapeutic Nutrition

Special diets to heal the gut, reduce inflammation, and even achieve disease remission

Smarter Meds Program

Unbiased truth about Rx drugs to reduce waste and dependence and minimize side effects

24/7 Expert Support

Multidisciplinary Care Team available 24/7 to prevent ER visits and get symptom flares under control fast

For Users, GIThrive Means

- Everything for better digestive health, all in one place
- Proven solutions that start to work immediately
- Better disease management—**freedom from** symptom flares
- **Lower out-of-pocket expenses** for Rx claims, medical co-pays and other costs

For You, GIThrive from Vivante Health Means

- Cutting-edge program that **NO ONE ELSE** is offering
- Greater productivity, morale and loyalty among covered populations
- **Measurable savings on medical and Rx drug claims**

GIThrive[®] FIRST and ONLY

digital program for gut health and disease

We're helping people get better while lowering their cost of care.
