

GIThrive provides complete care for everyone feeling the burden and stress from digestive health issues. Our comprehensive virtual GI care delivers the right care at the right time by pairing data-driven technology with a coordinated team of care providers including registered dietitians and health coaches.

Comprehensive Digital Platform

One virtual experience with 24/7 access and support including behavioral health using CBT.

Coordinated Clinical Care Team

Health coaches and registered dietitians available based on symptom severity and health history.

Technology Enabled Triage

Powerful AI and machine learning behind the scenes for more personalized and efficient care plans.

*"I can't believe my company offers this as a benefit!
Healthy and happy employees means we perform better
at work and that's very meaningful to me."
- GIThrive Member*
